Open Questions

General

Q1	What aspects of this course contributed most to your learning?	Total: 6
Dr. Jensen enhanced my learning by giving us Perusall assignments that allowed us to see different perspectives when it came to readings. Also, the Jeopardy! game helped me so much because it allowed me to prepare for the midterm. I appreciated the resources he gave us.		
I like the case studies and hands on things we did		
The aspects of this course that contributed most to my learning were the Jeopardy-style study materials provided by the professor, which made studying engaging and effective, and the group presentation at the end of the class, which allowed for collaborative learning and practical application of course concepts. Also the professor was very understanding and he did great considering that he was new.		
Case evaluations and independent/group work		
comment and response activities		
I appreciate the activity-based approach of this course, as it focuses on real-life applications rather than conventional assignments or homework. These activities help us connect classroom learning to real-world scenarios, making the lessons more practical and engaging. Additionally, using Folio to share course materials and articles is very convenient and enhances accessibility for		

students.		
Q2	How can this course be improved to enhance student learning? And why?	Total: 6
I believe the page limit for the final paper could be adjusted because of other student assignments in other courses. I believe that could be the only change.		
less group project/papers, I understand collaboration is important for skills in the workplace but I have never had a group project or paper that ever went well with people doing their work accordingly. independent work is much preferred because we are all adults who should be accountable for our own work.		
i feel like the course is too loaded. Maybe something could be done about that but overall, i liked it. Perhaps because of my HRM background.		
Clear connection to the literature and the program.		
less group work and more independent work being that its harder to gauge each individuals understanding of the material when its done in a group		
Close book exam
